SUMMARY

Backend-focused Software Engineer and 2026 B.Tech graduate with expertise in Java, Python, Spring Boot, and modern web frameworks. Specialized in scalable backend systems, REST API design, and integrating generative AI (Groq, Gemini) into full-stack, deployed applications. 150+ LeetCode problems solved. Immediately available for full-time SDE roles.

EDUCATION

B.Tech in Computer Science and Engineering — Galgotias University

2023 – 2026

Relevant Coursework: Algorithms, DBMS, Web Technologies

Diploma in Mechanical Engineering — LNCT & Science, Bhopal

Aug 2019 – Nov 2022

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Backend: Flask, Node.js, Express.js, REST APIs, JWT

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Vite

Databases: PostgreSQL, MySQL

AI & ML: Groq Llama API, Google Gemini API, BERT

Cloud & Tools: AWS, Docker

PROJECTS

AI Chatbot — Multi-Model Conversational Platform | [Live Demo](#)

Tech Stack: Flask, React.js, Supabase (PostgreSQL), Groq API, JWT, bcrypt, Vercel, Render

- Deployed a production split-architecture app (React on Vercel, Flask/Gunicorn on Render) with JWT + bcrypt auth and persistent per-user chat history in Supabase PostgreSQL.
- Built a runtime model router letting users switch between four Groq-hosted LLMs mid-conversation without losing session context.

LUXE — AI-Powered Luxury E-Commerce Platform | [GitHub](#)

Tech Stack: HTML5, CSS3, JavaScript, Flask, Socket.IO, Supabase PostgreSQL, JWT, Groq API, ReportLab

- Implemented real-time client-server communication with Socket.IO for a live AI shopping concierge, and enforced Row-Level Security policies on Supabase PostgreSQL for per-user data isolation.
- Automated PDF invoice generation with ReportLab, triggered on checkout completion.

45-Day Java Backend Study Tracker | [GitHub](#)

Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, Google Gemini API, Recharts

- Designed a structured 45-day Java/Spring Boot, SQL, DSA, and System Design curriculum with progress analytics dashboards built in Recharts.
- Built an AI mentor (Gemini API) that reviews submitted code and runs interactive technical quizzes.

VIRTUAL EXPERIENCE PROGRAMS

CCNA: Introduction to Networks — Cisco Networking Academy (via Galgotias University)

Apr 2025

- Completed 54 hands-on labs (~14 hours) covering IP addressing, Ethernet, and configuring connectivity between switches, routers, and end devices; verified credential via Credly.

AI in Process Intelligence Virtual Internship — EduSkills / AICTE (supported by Celonis)

Apr – Jun 2026

- Completed an 8-week structured virtual program applying AI techniques to process intelligence concepts; graded Outstanding.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 150+ Data Structures & Algorithms problems on LeetCode, spanning graphs, DP, segment trees, binary lifting, and sliding window techniques.
- Built and deployed multiple AI-powered full-stack applications using Java, Python, React.js, Flask, Docker, and PostgreSQL.
- Certifications: Google Cloud Generative AI Learning Path, Deloitte Australia Data Analytics & Cyber Job Simulations (Forage).
